Shubham Sharma

Staff SDET • QA Platform Engineer • Quality Architect

Specialization : Cloud-Native Quality Engineering & In-Cluster Testing • Kubernetes Testkube • Crossplane Multi-Cloud IaC • SRE Observability

LinkedIn • GitHub • npm

Location: Pune, India

Professional Summary

Visionary Staff SDET with nearly a decade (9.7 years) of experience spearheading quality engineering and organizational transformation for enterprise cloud-native SaaS platforms. A proven technical leader in architecting scalable, cloud-agnostic QA ecosystems across AWS, GCP, and Azure, driving "shift-left" practices that accelerate delivery, improve release confidence, and reduce operational costs.

Expert in building resilient continuous testing pipelines for complex microservices using modern stacks (Java, Kotlin, TS/JS, Playwright). Currently pioneering the future of QA through AI-assisted engineering—leveraging LLMs, Claude, Cursor, and MCP to build self-healing tests, automate regression analysis, and multiply developer productivity. Recognized as a strategic partner to cross-functional teams, combining deep platform expertise with AI-driven innovation to embed uncompromising quality into the software development lifecycle.

Skills Summary

• **Test Automation & Frameworks :** Playwright, Selenium, Cypress, RestAssured, K6, Testkube, Selenoid, Allure, ReportPortal, Contract Testing, API Testing

• **Languages & Backend :** Java, Kotlin, JavaScript, Python, Node.js, Spring Boot, GraphQL, Microservices, REST APIs

• **Cloud, DevOps & SRE :** AWS, Azure, GCP, Docker, Kubernetes, Crossplane, Jenkins CI/CD, Spinnaker, Git, Linux, Infrastructure as Code, Test Observability

• **Autonomous Testing & AI :** Model Context Protocol (MCP), Claude, Cursor, AI Auto-Review Bots, Self-Healing Pipelines, AI Failure Diagnostics

• **Quality Architecture & Practices :** Shift-Left Testing, TDD, Agile/Scrum, CI/CD Quality Gates, Release Management, Performance Engineering

Work Experience (Recent Leadership)

• **AlphaSense — Software Quality & Platform Engineering** — **Pune, India**
Staff SDET — *March 2025 – Present*

- Architected enterprise QA Platform MCP consolidating daily-driver MCP servers (GitLab, Linear, Slack, Allure, Testkube), exposing **350+ tools** and **150+ skills** for autonomous test execution.
- Engineered scheduled Self-Healing pipeline running on automated schedules to continuously detect persistent test failures, auto-heal broken tests, raise GitLab MRs, and request Slack peer reviews for **100%** robust test coverage.
- Built AI-powered Auto-Review bot with agentic skills that automatically inspects raised MRs, validates code quality, identifies logical gaps, and enforces engineering best practices.
- Developed an intelligent CI/CD Troubleshooting Agent for hard-gate failures, correlating test history, MR diffs, and integration service health to provide instant diagnostic verdicts.
- Designed org-wide Playwright agentic tools generating base automation scripts in minutes, reducing test bootstrap time by **90%**.

• **AlphaSense — Cloud Infrastructure & Test Automation** — **Pune, India**
Team Lead – QA Automation — *Oct 2023 – March 2025*

- Automated manual operational workflows using Slack automation, reducing response times by **65%** and improving operational efficiency.
- Integrated cloud resources using Crossplane across AWS, Azure, and GCP with **99.5%** uptime; optimized cloud costs via IaC saving **$1K+/month** (**12%** reduction).
- Implemented and enhanced Testkube with in-cluster testing, triggers, and reusable workflows, improving test observability by **50%**.
- Shifted validation to build-level execution in Jenkins continuous pipelines, reducing late-stage failures by **45%**.

• **AlphaSense — Framework Scalability & Core Automation** — **Pune, India**
Senior Automation QA — *Jan 2022 – Sept 2023*

- Led team of 3 QA engineers; managed sprint planning, automation roadmaps, and execution following Agile and Scrum methodologies.
- Built scalable automation frameworks using Java, JavaScript, Cypress, K6, and Selenide; integrated Spinnaker pipelines for continuous automated release verification.
- Implemented performance testing strategies for microservices and SQS-based systems, improving throughput by **35%** and reducing production incidents by **30%**.

• **AlphaSense — Multi-Tenant Quality Engineering** **Pune, India**
Automation QA *Mar 2020 – Dec 2021*

- Implemented frontend automation using Selenium (Java) and Selenide (Kotlin) with comprehensive API testing and contract testing coverage.
- Built backend API automation using Kotlin and RestAssured following shift-left testing practices.
- Automated GraphQL APIs and maintained large-scale regression suites (4K+ test cases) with **95%** pass rate.
- Integrated Allure, ReportPortal, and Selenoid Grid for test observability, reporting, and execution scalability across multi-tenant architecture.

• **Accenture — Enterprise Quality Engineering** **Pune, India**
QA Automation / Associate QA *Jan 2017 – Mar 2020*

- Automated 100+ healthcare enterprise web applications across enterprise client engagements under strict compliance standards.
- Executed E2E, regression, smoke, UAT, and UI testing within complete SDLC lifecycle, achieving a **98%** defect detection rate.
- Contributed to US healthcare & government programs with strict HIPAA/regulatory standards and automated validation gates.
- Built strong foundations in enterprise QA processes, documentation, test strategy, and quality engineering methodologies.

Key Projects & Technical Platforms

• **Enterprise QA Platform MCP — Autonomous Multi-Agent Testing Engine**

- Architected multi-agent system consolidating GitLab, Linear, Slack, Allure & Testkube tools to diagnose and remediate CI/CD failures autonomously with **350+ tools** and **150+ skills**.
- Empowered developers and SDETs to query test telemetry, triage pipeline logs, and trigger self-healing automated workflows via conversational prompts.

• **AI-Driven Regression Intelligence & Self-Healing Pipeline**

- Built AI-powered regression analyzer processing 4,000+ test cases daily, querying Grafana logs via MCP, analyzing GitLab commits, and diagnosing defect origins with **85%** accuracy.
- Dynamically correlates flakiness vs authentic code bugs, reducing triage turnaround time from hours to under 3 minutes.

• **AI-Assisted Test Gen & Auto-SDK Pipeline (Cursor, Claude, Swagger)**

- Developed polyglot test generation toolkit saving **80%** test authoring effort across Java, Node.js, and Python microservices.
- Automated client SDK updates directly from OpenAPI/Swagger specs, slashing API maintenance overhead by **85%**.

• **Crossplane Multi-Cloud Governance & Infrastructure as Code**

- Orchestrated cloud resources across AWS, Azure, and GCP using Crossplane with **99.5%** uptime and automated governance saving **$1K+/month**.
- Eliminated environment drift by codifying ephemeral test environments directly inside Kubernetes clusters.

Quality Architecture & Engineering Strategy

- **Enterprise SaaS Quality Strategy :** Owned continuous quality governance across US & UK regions, supporting horizontal multi-tenant scaling without compromising delivery velocity.
- **Code-Aware Testing Architecture :** Built service-aligned testing harnesses improving failure diagnosis by **60%** and reducing test flakiness by **50%**.
- **Shift-Left CI/CD Quality Gates :** Implemented automated gatekeeper checks in Jenkins and GitLab CI, reducing regression feedback cycles by **45%** and late-stage defects by **40%**.
- **Engineering Enablement & Mentorship :** Mentored 10+ QA engineers in cloud tooling, microservices debugging, and agentic workflows, improving team autonomy by **60%**.

Education

• **JECRC Foundation** **Jaipur, Rajasthan, India**
Bachelor of Technology in Mechanical Engineering | Aggregate: 68.1% *July 2012 – June 2016*

Certifications

• **VSkills Selenium Professional Certification** **Certified, 2019**
VSkills • Enterprise Web Automation, WebDriver Architecture, CI/CD Test Grids
