Shubham Sharma

Staff SDET • QA Platform Engineer • Quality Architect

LinkedIn • GitHub

Email: shubham.sharma75319@gmail.com
Mobile: +91-8769340009
Location: Pune, India

Skills Summary

• **Test Automation & Frameworks :** Playwright, Selenium, Cypress, RestAssured, K6, Testkube, Selenoid, Allure, ReportPortal, Contract Testing, API Testing

• **Languages & Stacks :** Java, Kotlin, JavaScript, Python, Node.js, Spring Boot, GraphQL, Microservices

• **Cloud, DevOps & SRE :** AWS, Azure, GCP, Docker, Kubernetes, Crossplane, Jenkins CI/CD, Git, Linux, Infrastructure as Code, Test Observability

• **Quality Architecture & Practices :** Autonomous Self-Healing, Shift-Left Testing, TDD, Agile/Scrum, CI/CD Quality Gates, Release Management

Work Experience

• **AlphaSense — Software Quality & Platform Engineering** — **Pune, India**

Staff SDET — ***March 2025 – Present***

- Architected enterprise QA Platform MCP consolidating daily-driver MCP servers (GitLab, Linear, Slack, Allure, Testkube), exposing **350+ tools** and **150+ skills** for autonomous test execution.
- Engineered scheduled Self-Healing pipeline auto-recovering failing tests, raising GitLab MRs, and requesting Slack review for **100%** robust test coverage.
- Built AI-driven Auto-Review bots & CI/CD troubleshooting agents analyzing hard-gate failures with test history and service health to trigger auto-healing.

• **AlphaSense — Cloud Infrastructure & Test Automation** — **Pune, India**

Team Lead – QA Automation — ***Oct 2023 – March 2025***

- Automated manual operational workflows using Slack automation, reducing response times by **65%** and improving operational efficiency.
- Integrated cloud resources using Crossplane across AWS, Azure, and GCP with **99.5%** uptime; optimized cloud costs via IaC saving **$1K+/month**.
- Implemented Testkube in-cluster testing and Jenkins continuous validation gates, shifting defects left and reducing late failures by **45%**.

• **AlphaSense — Framework Scalability & Core Automation** — **Pune, India**

Senior Automation QA & Automation QA — ***Mar 2020 – Sept 2023***

- Led team of 3 QA engineers; built scalable frameworks using Java, JS, Cypress, K6, and RestAssured with shift-left testing practices.
- Automated GraphQL APIs, SQS pipelines, and maintained 4K+ regression suites with Allure, ReportPortal, and Selenoid Grid scalability.

• **Accenture — Enterprise Quality Engineering** — **Pune, India**

QA Automation / Associate QA — ***Jan 2017 – Mar 2020***

- Automated 100+ healthcare enterprise web applications under strict compliance, achieving a **98%** defect detection rate across complete SDLC.

Projects and Technical Systems

• **Enterprise QA Platform MCP — Autonomous Testing Engine (Node.js, Claude, MCP)**

- Architected multi-agent system consolidating GitLab, Linear, Slack & Testkube tools to diagnose and remediate CI/CD pipeline issues autonomously.

• **AI-Assisted Test Gen & Auto-SDK Pipeline — Microservices Reliability (Claude, Cursor)**

- Built polyglot test generation toolkit saving **80%** test authoring effort and auto-syncing SDKs from Swagger specs with **85%** less overhead.

Education

• **JECRC Foundation** — **Jaipur, Rajasthan, India**

Bachelor of Technology in Mechanical Engineering | Aggregate: 68.1% — ***July 2012 – June 2016***

Certifications

• **VSkills Selenium Professional Certification** — ***Certified, 2019***

VSkills • Enterprise Web Automation, WebDriver Architecture, CI/CD Test Grids
